Machine Learning and Data Mining

Igor Kononenko, Matjaz Kukar

Machine Learning and Data Mining Igor Kononenko, Matjaz Kukar

Data mining is often referred to by real-time users and software solutions providers as knowledge discovery in databases (KDD). Good data mining practice for business intelligence (the art of turning raw software into meaningful information) is demonstrated by the many new techniques and developments in the conversion of fresh scientific discovery into widely accessible software solutions. This book has been written as an introduction to the main issues associated with the basics of machine learning and the algorithms used in data mining.

Suitable for advanced undergraduates and their tutors at postgraduate level in a wide area of computer science and technology topics as well as researchers looking to adapt various algorithms for particular data mining tasks. A valuable addition to the libraries and bookshelves of the many companies who are using the principles of data mining (or KDD) to effectively deliver solid business and industry solutions.

From reader reviews:

Dorathy Byers:

In this 21st centuries, people become competitive in each and every way. By being competitive at this point, people have do something to make these individuals survives, being in the middle of the actual crowded place and notice simply by surrounding. One thing that oftentimes many people have underestimated it for a while is reading. Yep, by reading a publication your ability to survive increase then having chance to remain than other is high. For you personally who want to start reading the book, we give you that Machine Learning and Data Mining book as beginner and daily reading book. Why, because this book is greater than just a book.

Eva Burton:

Now a day people who Living in the era exactly where everything reachable by connect to the internet and the resources within it can be true or not need people to be aware of each details they get. How people have to be smart in receiving any information nowadays? Of course the correct answer is reading a book. Studying a book can help individuals out of this uncertainty Information specially this Machine Learning and Data Mining book since this book offers you rich data and knowledge. Of course the information in this book hundred per cent guarantees there is no doubt in it as you know.

Arthur Warnick:

People live in this new day of lifestyle always try and and must have the free time or they will get wide range of stress from both everyday life and work. So , whenever we ask do people have free time, we will say absolutely yes. People is human not a robot. Then we inquire again, what kind of activity do you possess when the spare time coming to you of course your answer can unlimited right. Then do you ever try this one, reading textbooks. It can be your alternative within spending your spare time, the particular book you have read is definitely Machine Learning and Data Mining.

Regina Hash:

Playing with family in a very park, coming to see the water world or hanging out with pals is thing that usually you could have done when you have spare time, then why you don't try factor that really opposite from that. One activity that make you not feeling tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Machine Learning and Data Mining, you may enjoy both. It is very good combination right, you still need to miss it? What kind of hang-out type is it? Oh come on its mind hangout people. What? Still don't have it, oh come on its referred to as reading friends.
