## **Mixing the Waters: Environment, Politics, and the Building of the Tennessee -Tombigee Waterway (The University of Akron Press Series on Technology a) Jeffrey K. Stine**

The largest, most costly domestic public works project ever undertaken by the Army Corps of Engineers, the Tenn-Tom's 234 miles, five dams, and ten locks entailed the movement of more earth than was required to dig the Panama Canal. In a monumental history of the nation's largest navigation project, Jeffrey K. Stine records the struggle between the interests determined to build the waterway and the forces pitted against its completion. Based on extensive research, *Mixing the Waters* explores the intersection of environmental history, the history of technology, and U.S. political history. It chronicles the profound changes introduced by the environmental movement and addresses the importance of changing societal values, an issue at the heart of understanding the evolving relationship between technology and the environment.
