Mathematics for the Green Industry: Essential Calculations for Horticulture and Landscape Professionals Michael L. Agnew, Nancy H. Agnew, Nick Christians, Ann Marie VanDerZanden
Get this comprehensive guide to the use of math in the Green Industry.

Designed for both students and practitioners in the Green Industry, this book offers full coverage of the calculations necessary to effectively, safely, and economically manage a Green Industry operation. The authors provide clear explanations of all relevant mathematical principles and cover calculations inherent in all aspects of the Green Industry, from determining area and volume, to the application of fertilizers, pesticides, and growth regulators, to preparing design and installation cost estimates. Coverage includes computations for:

- Landscape installation and maintenance.
- Greenhouse, nursery, and interior landscape operation.
- Parks and recreation maintenance.
- Turf management, including lawn care, sports turf, and sod production.
- Proper application of fertilizers, pesticides, and plant-growth regulators.
- Proper calibration of application equipment.

Additional features include multiple computations you can work through, appendices with units of measure and equivalents, and a table with conversion factors.

From reader reviews:

Gonzalo Barnes:

Do you have favorite book? For those who have, what is your favorite's book? Reserve is very important thing for us to learn everything in the world. Each book has different aim or perhaps goal; it means that book has different type. Some people truly feel enjoy to spend their a chance to read a book. They may be reading whatever they acquire because their hobby is definitely reading a book. How about the person who don't like reading a book? Sometime, particular person feel need book whenever they found difficult problem or perhaps exercise. Well, probably you will need this Mathematics for the Green Industry: Essential Calculations for Horticulture and Landscape Professionals.

Darren Custer:

Here thing why this Mathematics for the Green Industry: Essential Calculations for Horticulture and Landscape Professionals are different and dependable to be yours. First of all examining a book is good but it really depends in the content than it which is the content is as yummy as food or not. Mathematics for the Green Industry: Essential Calculations for Horticulture and Landscape Professionals giving you information deeper and different ways, you can find any publication out there but there is no reserve that similar with Mathematics for the Green Industry: Essential Calculations for Horticulture and Landscape Professionals. It gives you thrill looking at journey, its open up your current eyes about the thing that happened in the world which is possibly can be happened around you. You can actually bring everywhere like in park your car, café, or even in your method home by train. In case you are having difficulties in bringing the paper book maybe the form of Mathematics for the Green Industry: Essential Calculations for Horticulture and Landscape Professionals in e-book can be your option.

Cindi Russell:

This book untitled Mathematics for the Green Industry: Essential Calculations for Horticulture and Landscape Professionals to be one of several books in which best seller in this year, that is because when you read this publication you can get a lot of benefit into it. You will easily to buy this kind of book in the book retailer or you can order it via online. The publisher in this book sells the e-book too. It makes you easier to read this book, as you can read this book in your Mobile phone. So there is no reason to you to past this e-book from your list.

Francis Gibbs:

Do you have something that you prefer such as book? The publication lovers usually prefer to decide on book like comic, short story and the biggest one is novel. Now, why not hoping Mathematics for the Green Industry: Essential Calculations for Horticulture and Landscape Professionals that give your satisfaction preference will be satisfied by means of reading this book. Reading behavior all over the world can be said

as the means for people to know world far better than how they react towards the world. It can't be explained constantly that reading practice only for the geeky man but for all of you who wants to become success person. So , for all you who want to start reading through as your good habit, you may pick Mathematics for the Green Industry: Essential Calculations for Horticulture and Landscape Professionals become your starter.
