3D Bioprinting and Nanotechnology in Tissue Engineering and Regenerative Medicine

Lijie Grace Zhang, John P Fisher, Kam Leong

3D Bioprinting and Nanotechnology in Tissue Engineering and Regenerative Medicine Lijie Grace Zhang, John P Fisher, Kam Leong

3D Bioprinting and Nanotechnology in Tissue Engineering provides an in depth introduction to these two technologies and their industrial applications. Stem cells in tissue regeneration are covered, along with nanobiomaterials. Commercialization, legal and regulatory considerations are also discussed in order to help you translate nanotechnology and 3D printing-based products to the marketplace and the clinic. Dr. Zhang's and Dr. Fishers' team of expert contributors have pooled their expertise in order to provide a summary of the suitability, sustainability and limitations of each technique for each specific application. The increasing availability and decreasing costs of nanotechnologies and 3D printing technologies are driving their use to meet medical needs, and this book provides an overview of these technologies and their integration. It shows how nanotechnology can increase the clinical efficiency of prosthesis or artificial tissues made by bioprinting or biofabrication. Students and professionals will receive a balanced assessment of relevant technology with theoretical foundation, while still learning about the newest printing techniques.

- Includes clinical applications, regulatory hurdles, and risk-benefit analysis of each technology.
- This book will assist you in selecting the best materials and identifying the right parameters for printing, plus incorporate cells and biologically active agents into a printed structure
- Learn the advantages of integrating 3D printing and nanotechnology in order to improve the safety of your nano-scale materials for biomedical applications

From reader reviews:

Julianna Pepper:

This book untitled 3D Bioprinting and Nanotechnology in Tissue Engineering and Regenerative Medicine to be one of several books this best seller in this year, that is because when you read this publication you can get a lot of benefit onto it. You will easily to buy that book in the book retail outlet or you can order it by way of online. The publisher of the book sells the e-book too. It makes you easier to read this book, because you can read this book in your Smartphone. So there is no reason to you to past this book from your list.

Douglas Reece:

Reading a reserve tends to be new life style on this era globalization. With studying you can get a lot of information that will give you benefit in your life. Along with book everyone in this world may share their idea. Ebooks can also inspire a lot of people. A lot of author can inspire their particular reader with their story or maybe their experience. Not only situation that share in the ebooks. But also they write about advantage about something that you need example of this. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that you can get now. The authors nowadays always try to improve their expertise in writing, they also doing some study before they write to the book. One of them is this 3D Bioprinting and Nanotechnology in Tissue Engineering and Regenerative Medicine.

Bridgett Killion:

Do you really one of the book lovers? If so, do you ever feeling doubt if you find yourself in the book store? Make an effort to pick one book that you never know the inside because don't ascertain book by its protect may doesn't work the following is difficult job because you are frightened that the inside maybe not while fantastic as in the outside look likes. Maybe you answer might be 3D Bioprinting and Nanotechnology in Tissue Engineering and Regenerative Medicine why because the excellent cover that make you consider in regards to the content will not disappoint anyone. The inside or content will be fantastic as the outside or even cover. Your reading 6th sense will directly show you to pick up this book.

Deanna Thompson:

Publication is one of source of understanding. We can add our understanding from it. Not only for students but in addition native or citizen want book to know the revise information of year to be able to year. As we know those ebooks have many advantages. Beside all of us add our knowledge, can bring us to around the world. By book 3D Bioprinting and Nanotechnology in Tissue Engineering and Regenerative Medicine we can have more advantage. Don't that you be creative people? To become creative person must love to read a book. Just simply choose the best book that appropriate with your aim. Don't possibly be doubt to change your life with that book 3D Bioprinting and Nanotechnology in Tissue Engineering and Regenerative Medicine. You can more desirable than now.
