Breast Cancer (Atlas of Clinical Oncology) Clifford A. Hudis M.D., Larry Norton M.D., David J. Winchester

Breast Cancer, Second Edition is intended to provide a comprehensive description of current and evolving aspects of breast cancer including the biologic basis of disease, epidemiology, risk assessment, diagnostic evaluation, treatment strategies, and surveillance measures. The second edition expands considerably on the first edition, containing greater emphasis on issues relevant to medical oncology and the broader oncology community. New to this edition are chapters on the male breast, breast cancer in the augmented breast, and breast cancer in multiethnic/multiracial populations.
