Transcendental and Algebraic Numbers (Dover Books on Mathematics)

A. O. Gelfond

Transcendental and Algebraic Numbers (Dover Books on Mathematics) A. O. Gelfond
Primarily an advanced study of the modern theory of transcendental and algebraic numbers, this treatment by a distinguished Soviet mathematician focuses on the theory's fundamental methods. The text also chronicles the historical development of the theory's methods and explores the connections with other problems in number theory. The problem of approximating algebraic numbers is also studied as a case in the theory of transcendental numbers.
Topics include the Thue-Siegel theorem, the Hermite-Lindemann theorem on the transcendency of the exponential function, and the work of C. Siegel on the transcendency of the Bessel functions and of the solutions of other differential equations. The final chapter considers the Gelfond-Schneider theorem on the transcendency of alpha to the power beta. Each proof is prefaced by a brief discussion of its scheme, which provides a helpful guide to understanding the proof's progression.

From reader reviews:

Kathy Wilson:

Have you spare time for any day? What do you do when you have more or little spare time? Yep, you can choose the suitable activity intended for spend your time. Any person spent their own spare time to take a wander, shopping, or went to the particular Mall. How about open or read a book entitled Transcendental and Algebraic Numbers (Dover Books on Mathematics)? Maybe it is to be best activity for you. You know beside you can spend your time along with your favorite's book, you can smarter than before. Do you agree with it is opinion or you have other opinion?

James Brier:

As people who live in often the modest era should be revise about what going on or details even knowledge to make these individuals keep up with the era and that is always change and progress. Some of you maybe can update themselves by reading books. It is a good choice for yourself but the problems coming to you is you don't know which one you should start with. This Transcendental and Algebraic Numbers (Dover Books on Mathematics) is our recommendation so you keep up with the world. Why, as this book serves what you want and want in this era.

Kevin Mabry:

People live in this new day time of lifestyle always try and and must have the extra time or they will get large amount of stress from both lifestyle and work. So , if we ask do people have time, we will say absolutely without a doubt. People is human not a robot. Then we consult again, what kind of activity are there when the spare time coming to you of course your answer will probably unlimited right. Then do you ever try this one, reading publications. It can be your alternative throughout spending your spare time, the particular book you have read will be Transcendental and Algebraic Numbers (Dover Books on Mathematics).

David Clark:

Reading a e-book make you to get more knowledge from this. You can take knowledge and information originating from a book. Book is published or printed or highlighted from each source which filled update of news. In this particular modern era like at this point, many ways to get information are available for an individual. From media social similar to newspaper, magazines, science publication, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Do you want to spend your spare time to spread out your book? Or just trying to find the Transcendental and Algebraic Numbers (Dover Books on Mathematics) when you necessary it?
